How to Install

iOS

Step1/2-Installation

Quick Installation

1. With iOS 17.4 and above, Tap the [Auto Install](#) to set up your eSIM.

QR code Installation

1. Go to 'Settings > Cellular > Add eSIM'.
2. Choose 'Use QR code' then scan the code.
3. Tap 'Activate eSIM' then 'Continue'.
4. Select a label or input a custom label for subsequent use.

Manual Installation

1. Go to 'Settings > Cellular > Add eSIM'.
2. Choose 'Use QR code' then tap 'Enter Details Manually' at the bottom, Enter 'SM-DP+ Address' and 'Activation Code', then click 'Next'.
3. Tap 'Activate eSIM' then 'Continue'.
4. Select a label or input a custom label for subsequent use.

Step2/2-Setting up data access

1. Choose the eSIM, enable 'Turn On This Line', and turn on 'Data Roaming' .
2. Select your eSIM as the default network for 'Cellular Data', do not turn on 'Allow Cellular Data Switching'.
3. If your eSIM connects to an incorrect network, go to 'Network Selection' and select the correct network.

Android

Step1/2-Installation

QR code Installation

1. Go to 'Settings', tap 'Network & internet', then tap + next to SIMs.
2. Tap 'Download a SIM instead?', then tap 'Next' in the following page.
3. When you see 'Scan QR code from network', use your phone to scan the QR code, then tap 'Download'.
4. When screen shows “Download Complete” , tap 'Settings'.

Manual Installation

1. Go to 'Settings', tap 'Network & internet', then tap + next to SIMs.
2. Tap 'Download a SIM instead?', then tap 'Next' in the following page.
3. Tap 'Need help?', then tap 'Enter it manually'.
4. Enter the code for Android, tap 'Continue' then tap 'Download'.
5. When screen shows “Download Complete” , tap 'Settings'.

Step2/2-Setting up data access

1. Choose the eSIM from SIMs.
2. Turn on 'Use Sim' and select 'Yes'.
3. Turn on 'Mobile data'.
4. Turn on 'Roaming' then select 'OK'.
5. If your eSIM connects to an incorrect network, tap 'SIMs' then tap 'Automatically select network' in the next page to select the correct network manually.
